IMPORT FLOW

AI AND PERSISTENCE MAY FALL BACK

Start with intake, stage evidence, then decide whether the item belongs in correspondence, a case, or a draft path.

IMPORT INTAKE WORKBENCH

Manual intake and staging

Imported material enters here first. This prototype keeps intake, classification, and correspondence review visible without adding backend storage or routing.

BULK EVIDENCE INTAKE

Bring Outlook exports in safely

Bulk intake accepts exported email evidence without connecting to Outlook directly. ZIP extraction happens server-side only, unsupported files are skipped safely, and PST archives stay preservation-only in this sprint.

ZIP OF EMLS

Upload a ZIP archive of exported .eml files for safe server-side extraction and parsing.

Guidance

PST PRESERVATION ONLY

Store the PST archive as preservation evidence. No PST parsing is performed in this sprint.

Guidance

MANUAL PASTED EMAIL FALLBACK

Use the existing manual intake form for urgent active investigation records that need immediate capture.

Bulk Outlook evidence intake

NOTES

Add a short context note for the batch.

Choose Files No file chosen

ZIP extraction happens server-side only. Only exported .eml files are accepted from ZIP archives. PST files are preserved only and not parsed in this sprint.

Suggested first-pass limits: ZIP up to 50 MB, up to 200 .eml files per batch, extracted .eml files up to 10 MB each, and total extracted EML content up to 100 MB.

Selected files: No files selected

Run bulk intake

Selected EML files are parsed with the existing EML parser.

EVIDENCE GUIDANCE

Imported email content is evidence of the message content. Conclusions drawn from the content still need a separate classification as Fact, Reported, Inference, or Assumption.

 No Outlook connection, Graph access, IMAP/SMTP, or email sending is used here.

RECENT BATCHES

Select a batch to inspect its summary and item-level statuses.

Bulk Outlook evidence intake
